

RECEIVING TEXT NOTIFICATIONS ON YOUR CELL PHONE

Please follow the steps below.

1. Share your current cell phone number with a staff member at your student's school office.
2. Someone from the North East School District will notify you once your number has been added into the system.
3. After you have received notification from the district you will need to complete the following action:
TEXT the word ALERT to the number 22300

This will activate your cell phone number in the One Call Now system to receive text messages.
4. If your number changes you must notify office personnel and repeat the steps above in order to continue receiving text alerts.

*Depending on your cell phone service plan, there may be an associated fee when receiving text messages. Therefore cellular service providers require that phone owners "Opt-In" and take deliberate action confirming their desire to accept text messages from our **OneCall Now**® system.*
